Introduction

Builds the AI software that real companies run every day — the kind that handles paying customers, private data, and regulated work, not demos. Focus areas: **women's health, cultural technology, and early-stage startup infrastructure**. Works AI-native by default: directs coding agents (Claude Code, Codex) and the same **Claude Agent SDK, MCP, and agent skills** stack Anthropic's own partners use, and owns the judgment calls that decide what actually ships — publishing the work as open-source examples other teams build on.

How I Work

Hiring is a two-way match — so here's my half of it: how I work, and the teams I do my strongest work with.

I build with agents as the default layer, not an occasional assist.

My day is spent directing coding agents (Claude Code, Codex) and reviewing what they produce — I've moved from writing most code by hand to orchestrating it and owning the judgment calls. That shift is the whole point: when execution gets cheap, the work that matters is choosing what to build, framing the problem well, and having the taste to keep only what's worth keeping.

Professional AI tooling is infrastructure — and I treat it as a baseline.

A Claude Code or Codex subscription is foundational to how I work, the way a laptop and cloud access are. I read its honest cost the way Anthropic's own team does: not against a monthly SaaS line item, but against the engineer-hours it replaces. A team that equips its builders with first-class AI tooling has usually thought seriously about velocity; one that withholds it usually hasn't — so it's among the first things I look for.

I'm a builder who owns problems end to end, not a single lane on an org chart.

The clean split between “pure frontend”, “pure backend”, and “pure UI/UX” is a holdover from when one person couldn't reasonably hold all three. With agents, I can — and I'd rather own a problem from data model to interface to the assets that launch it than fill one box and hand off at every seam. I do my strongest work where authority follows the work, not the title.

I look for organisations that are AI-native by design, not by adoption.

Using AI tools and being AI-native aren't the same thing. The teams I do my best work with have rebuilt how the work actually flows — agents carry the routine execution, people show up for the judgment — instead of bolting AI onto a process designed for a pre-agent world. If that's the direction you're building in, we'll move fast together.

What I Build With AI

“Engineer” undersells it. With AI as the multiplier, I build across the whole product surface — the agent, the system around it, the brand it ships under, and the documents and marketing that carry it:

AI agents & multi-agent systems — guardrails enforced in code, built to run in production with paying customers — not demos.

MCP servers — shipped one of the earliest in the ecosystem (Google News MCP, 35 days after Anthropic's launch) — now listed across 15+ catalogs.

Agent skills — including the official Typst skill for Claude Code — it typesets this very CV.

Visual brand & design systems — a full Caldera-grade brand system (tokens, type, motion) and gradient-svg-generator with 340+ animated-SVG templates.

Workflows & internal tooling — CI/CD pipelines, internal CLIs, multi-agent “teams”, code-review automation, and IDE hooks that compound across an engineering org.

Documents as code — agendas, contracts, receipts, papers, Speaker & Media Kits, this CV — all typeset programmatically in Typst: version-controlled, reproducible, no templates and no hosted doc-gen service.

Marketing assets — branded social & OG cover images, promotional graphics, and short-form video — produced through code, on-brand, at speed.

Experience

AI Agent Architect

Engram · May 2026 — Present
Albuquerque, New Mexico, United States · **Remote**

Recruited onto **Anthropic's Partner Network architect track** — the founder used his own Claude agent to surface candidates, and Chan's open-source portfolio was the recommendation (publicly confirmed). 45-day Architect Cohort: **Claude Certified Architect — Foundations** curriculum.

AI Instructor & Mentor

TechNest Community · Apr 2026 — Present
St John's, Newfoundland, Canada · **Remote**

Built and sole-teaches TechNest's first AI-specialised mentorship track — a **12-week prompt-first curriculum where students ship portfolio-grade AI apps by week 8**. Also built the bilingual teaching platform 95.7% solo, including an in-course RAG assistant on Cloudflare Workers (Llama 3.1 8B + Vectorize + KV).

Founding Principal Engineer, Activation, Execution & AI Systems

GAVIGO Inc. · Oct 2025 — Present
Wilmington, Delaware, United States · **Remote**

Promoted **Core Engineer** → **Founding Principal Engineer across three contract iterations** — owns the Intelligence Layer of GAVIGO's sub-millisecond app activation platform (lets users open straight into a game without an app-store install). **p50 < 1 ms activation latency · 84.6% warm-pool hit rate** · cross-cloud DigitalOcean → GCP GKE migration in a **30-minute zero-downtime cutover · 98% solo on 353 commits**.

Senior Full-Stack Engineer & Website Team Lead

She Sharp · Jul 2025 — Present
Auckland, New Zealand · **Hybrid**

Recruited by founder Dr Mahsa Mohaghegh to rebuild **New Zealand's leading women-in-STEM platform (2,200+ registered members, 8,000+ women supported lifetime)**. Webflow → Next.js cutover **86.6% solo across 10 months**, 10+ years of legacy content preserved with **zero broken inbound links**, AI mentor-matching engine (GPT-4o-mini, 5-dimensional scoring) shipped on top.

Chief Technology Officer

FemTech Weekend · Mar 2025 — Present
Chengdu, Sichuan, China · **Remote**

Sole technical lead for **China's first FemTech organisation** since its inaugural conference — built and rebuilt the entire web platform twice (Next.js Gen-1 → Docusaurus Gen-2 editorial rewrite). Currently operating the **2026 Shanghai Summit — 16 confirmed speakers, including FemTech-term originator Ida Tin**.

Previously: CTO at Sanicle (prev. Senior AI/ML Infrastructure Engineer; Tulsa, Oklahoma, US · remote) — earned the company its **IBM Silver Partner** certification through a solo build (350+ commits) · **ByteDance Full-Stack Engineer** on the Douyin Mall capstone (Beijing, China · remote; Spring Boot 3 + solo Vue 3, 2 of 8 contributors) · **React Native full-stack mobile dev at CORDE Christchurch** (Canterbury, NZ · hybrid) · **Forward With Her mentor** (China · remote; 7 of 18 LinkedIn recs from this cohort).

Selected Open-Source Projects

Tam-Ai-Ti tamaiti.whiri-ai.com/

An AI financial-wellness app built around te ao Māori — the user's culture lives in the data model, not just the translation layer · commissioned solo by Riria (Missy) Te Kanawa (ASB Bank · former KPMG NZ National Māori Sector lead).

- 351 commits solo · 48 tables / 494 columns / 22 migrations · 3-model OpenAI composition (gpt-4o-mini coach turns + gpt-4o synthesis + gpt-4o-realtime-preview voice).
- **Schema-first te reo Māori** — Maramataka lunar phases and Te Whare Tapa Whā wellness domains live as first-class Drizzle enum types, not UI labels (prevents the “i18n drift” where cultural concepts decay into English-only columns).
- **19-user research cohort sustained 4 months** · 181 bilingual journal entries · 35 voice sessions · 146 AI coach messages · 74 daily check-ins.

echhook — claude-code-audio-hooks github.com/ChanMeng666/echhook

A noise-control system for AI coding assistants — turns down their constant audio chatter during deep work, and alerts only on the things that matter.

- **Reference implementation of the Claude Agent SDK hooks lifecycle** — PreToolUse · PostToolUse · status line · context-window quota. 26 hook events · 42 releases · 139 tests on triple-platform CI (Linux / macOS / Windows).
- **Cross-tool by design** — one hook system, three IDE surfaces: Claude Code, Cursor, OpenAI Codex.
- Started as an internal noise-fix for long-running background agents; open-sourced after teammates asked for it; now community-adopted across all three IDEs.

Vitex — AI Career Agent www.vitex.org.nz/

Paste a job description, get a tailored resume + cover letter scored against the JD's keywords in under 30 seconds · 95% solo · 168 commits · Vercel AI SDK + GPT-4o + Typst.

- **7-step AI pipeline streaming over SSE** (JD parsing → background → match analysis → resume tailoring → ATS scoring → cover letter → Typst doc generation) · every stage Zod-validated structured output.
- **Typst compiles PDFs locally in under 100 ms** across 14 AI-auto-selected templates — no hosted Chromium, no third-party doc-gen API.
- **Three production migrations** (Railway → Cloudflare Workers → DigitalOcean VPS) + LaTeX → Typst engine swap, zero downtime · Docker + Traefik + GitHub Actions CD · Stripe credits ledger + share-token URLs.

Google News MCP Server glama.ai/mcp/servers/ChanMeng666/server-google-news

Earliest-ecosystem MCP server — gives AI assistants live Google News access. Shipped 35 days after Anthropic's Nov 2024 MCP launch.

- **Featured in Skywork AI's AI-engineer deep-dive guide** — listed across **15+ MCP catalogs** · PulseMCP “Top Pick” · Glama A-rating · 122 stars · @chanmeng666/google-news-server on npm.
- **Shipped before MCP had a registry** — built its own discovery story (PulseMCP + Glama + npm submissions), compounding into a first-mover index advantage as catalogs came online.

Also built: eatropolis.co.nz (solo 9-day commercial event platform for Chow Luck Club × Tātaki Auckland Unlimited / Auckland Council) · [gradient-svg-generator](#) (340+ animated-SVG templates, 273 solo commits) · [typst-claude-skill](#) (official Typst skill for Claude Code — typesets this CV) · [SunoStats](#) (industry's first Suno music lineage explorer · trilingual English / Simplified Chinese / Japanese) · [FanFic Lab](#) (7-node LangGraph agent).

Recognition

- **UN CSW 69 Speaker** — UN HQ NYC, Mar 2025 · attracted **IBM pilot interest** and an endorsement from Sierra Leone’s Minister of Gender and Children’s Affairs.
- **Outstanding Mentor Award** — AI Hackathon Festival 2025 · 1 of 14 expert mentors · guided 11 teams / 80+ participants.
- **Excellence Award** — FemTech China (Women’s Health Technology Challenge, Dec 2024).

- **UN Women FemTech Hackathon — Outstanding Performer** — FemTech Weekend, Beijing (Mar 2025).

Certifications & Training

Anthropic (6)

- **Building with the Claude API · Intro to MCP · Intro to Agent Skills · Claude Code in Action** (all May 2026; **Claude Code in Action** originally Aug 2025) · **AI Fluency: Framework & Foundations** (Aug 2025)
- **Claude Certified Architect — Foundations** curriculum completed (on the Anthropic Partner Network track via Engram)

Other AI / Cloud

- **Google AI Essentials · Microsoft Azure AI Essentials · Generative AI Career Skills · Wolfram Machine Learning Foundations · GitHub Professional · Docker Professional · Microsoft Software Development** (Dec 2024 — Aug 2025)

Engineering & platforms (50+ total)

- **HackerRank Software Engineer** + 22 skill certifications — **SQL (Advanced)** · Problem Solving · Go · Node.js · React · Angular
- **Microsoft** (Azure · System Administration · Project Management) · **C++ Institute** · **Anaconda Python** · **Atlassian Agile** · **Mozilla**

Education

Master of Applied Computing

Lincoln University — New Zealand

Nov 2023 — Dec 2024

Distinction (80%+) · Dean's List, Top 5%
