Chan Meng

Web Product & Full-stack Engineer | Accessibility (WCAG 2.2 AA), SEO, AI | Founder Experience
chanmeng.career@gmail.com | +64 28 8510 9245 | Auckland, New Zealand
chanmeng.org | linkedin.com/in/chanmeng666 | github.com/ChanMeng666

PROFESSIONAL SUMMARY

Web product and full-stack engineer with founder experience, used to owning a public website end to end with the client: Eatropolis.co.nz, the live site for Auckland's one-day culinary festival, commissioned by Chow Luck Club Ltd and reviewed by Tātaki Auckland Unlimited, built to WCAG 2.2 AA with a voice-enabled AI event guide and a GitHub-as-CMS workflow the non-technical client uses to edit content; She Sharp's membership and events platform as one of two developers (251 merged pull requests); and ArchCanvas, an AI design agent founded and built solo.

TECHNICAL SKILLS

Web product and quality: WCAG 2.2 AA (NZ Government Web Accessibility Standard 1.2), axe-core, Playwright, Lighthouse, SEO, k6 load testing, GA4, Cloudflare Web Analytics, privacy-compliant analytics, GitHub-as-CMS (MDX, JSON), phased launches
Languages and frameworks: TypeScript, Python, Go, Java, SQL, Next.js 16, React, React Native, Vue 3, Spring Boot 3, FastAPI, TailwindCSS, Drizzle ORM, Zod
AI and agent engineering: Claude Agent SDK, OpenAI Agents SDK, Model Context Protocol (MCP), LangGraph, LangChain, CopilotKit, Vercel AI SDK, RAG pipelines, multi-agent orchestration, evaluation harnesses
Infrastructure, data, and quality: Neon Postgres, Supabase, Redis, Cloudflare Workers, Docker, Stripe, NextAuth 5, Vitest, Cypress, web-vitals, OpenTelemetry, multi-tenant isolation, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Founder & Sole Engineer

ArchCanvas | Auckland, New Zealand | Remote | Apr 2026 - Present

- Scope: solo founder and engineer; live with payments and maintained. Building an AI design agent for architects and self-builders; invented ArchLang, the open-source language that compiles a floor plan into a dimensioned drawing (62 npm releases, 139 diagnostic codes), so every plan is checked and an edit is exact; live at archcanvas.uk and archlang.uk.

Senior Full-Stack Engineer & Website Team Lead

She Sharp | Auckland, New Zealand | Hybrid | Jul 2025 - Sep 2026

- Scope: one of two developers (opened 207 of 254 pull requests) for a volunteer-run New Zealand women-in-STEM charity (96+ events since 2014) with a 1,549-person mailing list. Recruited by founder Dr Mahsa Mohaghegh to move it off rented software onto infrastructure it owns, leading a 13.3-month build of sign-ups, memberships, events and GPT-4o-mini mentor matching (251 merged pull requests, 94.5% of lines added).
- Cut the mailing list over from Mailchimp to self-hosted double opt-in with 0 failures, and rewrote the charity's recurring work as 11 agent skills, reviewed by pull request and type-checked in CI, that non-engineers can follow; built shesharp.org.nz, its newsletter and its event decks.

Remote work for overseas teams, in parallel (Mar 2025 - Present)
Chief Technology Officer

FemTech Weekend | Chengdu, Sichuan, China | Remote | Mar 2025 - Present

- Scope: sole engineer, remote, reporting to the founder. Built two platform generations for an organisation self-described as China's first in women's health technology, including the pages and application system for its 2026 Shanghai Summit (four days, 33 speakers, headlined by Ida Tin); site: femtechweekend.com.

Founding Principal Engineer, Activation, Execution & AI Systems

GAVIGO Inc. | Wilmington, Delaware, United States | Remote | Oct 2025 - Oct 2026

- Scope: founding engineer at an early-stage startup, reporting to the CEO; wrote 471 of 488 commits, with a second engineer from Jun 2026. Owned the Intelligence Layer of an app-activation platform: a Go orchestrator running a seven-trigger AI rules engine, a warm-pool manager and a five-state activation spine in Redis, on live Kubernetes (GKE) — 78% less application-level startup work and a 4.45 s to 1.00 s

startup path in controlled proof-stage tests; migrated DigitalOcean to Google Cloud in a 30-minute cutover; promoted from Core Engineer; live at ire.gavigo.com.

Chief Technology Officer
Sanicle | Tulsa, Oklahoma, United States | Remote | Mar 2025 - Feb 2026
- Scope: promoted to CTO leading a team of five; did the 14-week core build solo. Took the product from a no-code prototype to a multi-tenant B2B FemTech SaaS and built the company website and the IBM watsonx integration behind Sanicle's IBM Silver Partner certification.

AI Instructor & Mentor, TechNest Community | St John's, Newfoundland, Canada | Apr 2026 - Aug 2026
AI Agent Architect, Engram | Albuquerque, New Mexico, United States | May 2026 - Jul 2026

Earlier experience
Technology & Professional Development Mentor, Forward with Her | China | Oct 2024 - Sep 2025
Backend Developer — Youth Training Camp, ByteDance | China | Nov 2024 - Mar 2025
Full Stack Developer & Lead Documenter, CORDE | Canterbury, New Zealand | Jun 2024 - Oct 2024

PROJECTS

Eatropolis Website (client commission) | eatropolis.co.nz
Scope: solo developer under a signed 4 May 2026 agreement with Chow Luck Club Ltd (Director Bee Keng Koh, PM Armand Bentigan); event partner and co-reviewer Tātaki Auckland Unlimited for Auckland Council Events; live since Jun 2026 for the 10 Oct 2026 festival (30+ award-winning chefs, Shed 10, Queens Wharf).

- Delivered in two visibility phases agreed with the client: a teaser with newsletter sign-up (public 22 May 2026), then the full site (public 5 Jun 2026), each gated by Tātaki Auckland Unlimited accessibility and content review.
- Built to WCAG 2.2 AA (NZ Government Web Accessibility Standard 1.2): 39/39 axe-core Playwright tests pass; Lighthouse accessibility, SEO and best-practices at 90 or above on measured routes.
- Measured results: Dishes page mobile Lighthouse Performance 71 to 84; k6 load test at 1,000 concurrent visitors with 0.00% errors over 113,320 requests; mail-tester 10/10 with SPF, DKIM and DMARC.
- Added a voice-enabled AI event guide grounded only in the site's own content (dates, tickets, partners, transport), rate-limited per visitor and behind a provider abstraction.
- Set up a GitHub-as-CMS workflow with one-click edit links; the non-technical client made a dozen content edits during the teaser phase and maintains the site after handover training.

a11y-loop | github.com/ChanMeng666/a11y-loop
A Claude Code skill and CLI that makes AI coding agents write accessible UI, audits it in a real browser (Playwright, axe-core, WCAG 2.2 AA) and lists what it could not check; being adopted by My Life My Voice, the disability-led New Zealand organisation that set the problem.

Also built: Tam-AI-Ti (a te reo Māori and English AI financial-wellness app; a 19-user cohort produced 181 journal entries in 4 months) and echook (a Claude Code hooks plugin).

EDUCATION

Master of Applied Computing, Lincoln University, New Zealand | Nov 2023 - Dec 2024 | Distinction, Dean's List (Top 5%)
Bachelor of Geography Science, Jiangsu Normal University, China | Sep 2012 - Jun 2016 | Distinction

CERTIFICATIONS

Anthropic (6): Building with the Claude API, Intro to MCP, Intro to Agent Skills, Claude Code in Action, AI Fluency: Framework and Foundations, Claude Certified Architect (Foundations): practice exam passed
Other (50+ total): Google AI Essentials, Microsoft Azure AI Essentials, HackerRank Software Engineer plus 22 skill certifications

AWARDS AND RECOGNITION

- UN CSW 69 Speaker (by video link), UN Headquarters, New York, Mar 2025 — drew IBM pilot interest and an endorsement from Sierra Leone's Minister of Gender and Children's Affairs.
- Outstanding Mentor Award, Aotearoa AI Hackathon Festival, won in 2025 (1 of 14 mentors) and again in 2026, a second consecutive year; Excellence Award, FemTech China Women's Health Technology Challenge (Dec 2024); Outstanding Performer, UN Women FemTech Hackathon, Beijing (Mar 2025).
- Community: 530+ GitHub stars on own repos, 27 LinkedIn recommendations. Open-source contribution: 2 merged, maintainer-approved pull requests to CopilotKit.
