Chan Meng

Product & Full-stack AI Engineer | TypeScript, React, Next.js | Founder Experience
chanmeng.career@gmail.com | +64 28 8510 9245 | Auckland, New Zealand
chanmeng.org | linkedin.com/in/chanmeng666 | github.com/ChanMeng666

PROFESSIONAL SUMMARY

Product and full-stack AI engineer with founder experience, shipping AI features inside products people use: ArchCanvas, an AI design agent founded and built solo on the open-source ArchLang compiler (62 npm releases); She Sharp's membership and events platform as one of two developers (251 merged pull requests); and open-source MCP tooling with 129 GitHub stars. TypeScript, React and Next.js on Postgres, with tests, CI and pull-request review as the guardrail; used to owning a product end to end with a founder at an early-stage startup.

TECHNICAL SKILLS

Languages and frameworks: TypeScript, Python, Go, Java, SQL, Next.js 16, React, React Native, Vue 3, Spring Boot 3, FastAPI, TailwindCSS, Drizzle ORM, Zod
AI and agent engineering: Claude Agent SDK, OpenAI Agents SDK, Model Context Protocol (MCP), LangGraph, LangChain, CopilotKit, Vercel AI SDK, RAG pipelines, multi-agent orchestration, JSON Schema outputs, prompt caching, model-tier routing with fallback, evaluation harnesses, mcp-evals
Infrastructure, data, and quality: Neon Postgres, Supabase, Redis, Cloudflare Workers, Docker, Stripe, NextAuth 5, Vitest, Cypress, web-vitals, OpenTelemetry, multi-tenant isolation, CI/CD pipelines
Claude Code and Codex CLI: CLAUDE.md, Agent Skills, Subagents, Hooks, Status line, Plugins, AGENTS.md, sandbox and approval policies, headless mode
Models: Anthropic Claude Opus 5, Sonnet 5, Haiku 4.5, OpenAI gpt-5.5, GPT-4o, realtime, Gemini, Llama

PROFESSIONAL EXPERIENCE

Founder & Sole Engineer
ArchCanvas | Auckland, New Zealand | Remote | Apr 2026 - Present
- Scope: solo founder and engineer; live with payments, ahead of public launch. Building an AI design agent for architects and self-builders; invented ArchLang, the open-source language that compiles a floor plan into a dimensioned drawing (62 npm releases, 139 diagnostic codes), so every plan is checked and an edit is exact; live at archcanvas.uk and archlang.uk.

Senior Full-Stack Engineer & Website Team Lead
She Sharp | Auckland, New Zealand | Hybrid | Jul 2025 - Sep 2026
- Scope: one of two developers (opened 207 of 254 pull requests) for a volunteer-run New Zealand women-in-STEM charity (96+ events since 2014) with a 1,549-person mailing list. Recruited by founder Dr Mahsa Mohaghegh to move it off rented software onto infrastructure it owns, leading a 13.3-month build of sign-ups, memberships, events and GPT-4o-mini mentor matching (251 merged pull requests, 94.5% of lines added).
- Cut the mailing list over from Mailchimp to self-hosted double opt-in with 0 failures, and rewrote the charity's recurring work as 11 agent skills, reviewed by pull request and type-checked in CI, that non-engineers can follow; built shesharp.org.nz, its newsletter and its event decks.

Remote work for overseas teams, in parallel (Mar 2025 - Present)
Chief Technology Officer
FemTech Weekend | Chengdu, Sichuan, China | Remote | Mar 2025 - Present
- Scope: sole engineer, remote, reporting to the founder. Built two platform generations for an organisation self-described as China's first in women's health technology, including the pages and application system for its 2026 Shanghai Summit (four days, 33 speakers, headlined by Ida Tin); site: femtechweekend.com.

Founding Principal Engineer, Activation, Execution & AI Systems
GAVIGO Inc. | Wilmington, Delaware, United States | Remote | Oct 2025 - Oct 2026
- Scope: founding engineer at an early-stage startup, reporting to the CEO; wrote 471 of 488 commits, with a second engineer from Jun 2026. Owned the Intelligence Layer of an app-activation platform: a Go orchestrator running a seven-trigger AI rules engine, a warm-pool manager and a five-state activation spine in Redis, on live Kubernetes (GKE) — 78% less application-level startup work and a 4.45 s to 1.00 s

startup path in controlled proof-stage tests; migrated DigitalOcean to Google Cloud in a 30-minute cutover; promoted from Core Engineer; live at ire.gavigo.com.

Chief Technology Officer
Sanicle | Tulsa, Oklahoma, United States | Remote | Mar 2025 - Feb 2026
- Scope: promoted to CTO leading a team of five; did the 14-week core build solo. Took the product from a no-code prototype to a multi-tenant B2B FemTech SaaS and built the company website and the IBM watsonx integration behind Sanicle's IBM Silver Partner certification.

AI Instructor & Mentor, TechNest Community | St John's, Newfoundland, Canada | Apr 2026 - Aug 2026
AI Agent Architect, Engram | Albuquerque, New Mexico, United States | May 2026 - Jul 2026

Earlier experience
Technology & Professional Development Mentor, Forward with Her | China | Oct 2024 - Sep 2025
Backend Developer — Youth Training Camp, ByteDance | China | Nov 2024 - Mar 2025
Full Stack Developer & Lead Documenter, CORDE | Canterbury, New Zealand | Jun 2024 - Oct 2024

PROJECTS

a11y-loop | github.com/ChanMeng666/a11y-loop
A Claude Code skill and CLI that makes AI coding agents write accessible UI, audits it in a real browser (Playwright, axe-core, WCAG 2.2 AA) and lists what it could not check; being adopted by My Life My Voice, the disability-led New Zealand organisation that set the problem.

Google News MCP Server | github.com/ChanMeng666/server-google-news
One of the earliest Model Context Protocol servers, shipped 35 days after Anthropic launched MCP and before a registry existed: a PulseMCP Top Pick, a Glama A-rating, and 129 GitHub stars.

AI Programming Education Platform | programming.chanmeng.org
A bilingual Docusaurus platform (211 of 220 commits) carrying five cohort versions of AI-programming teaching side by side, three concurrent in 2026, for TechNest's 2026 AI Track and academyEX's Her Waka, with a Cloudflare Workers RAG assistant doing version-aware retrieval over about 1,200 chunks.

echook | github.com/ChanMeng666/echook
An AI-operated hooks plugin for Claude Code, Cursor IDE and Codex CLI, installed and driven entirely in natural language, grown from audio notifications into session telemetry and four shipped Claude Code extension surfaces: hooks, skills, a context-window status line and plugin packaging.

Also built: eatropolis.co.nz (Auckland's official culinary festival, commissioned by Chow Luck Club Ltd with Auckland Council's agency Tātaki Auckland Unlimited) and Tam-AI-Ti (a te reo Māori and English AI financial-wellness app; a 19-user cohort produced 181 journal entries in 4 months).

EDUCATION

Master of Applied Computing, Lincoln University, New Zealand | Nov 2023 - Dec 2024 | Distinction, Dean's List (Top 5%)
Bachelor of Geography Science, Jiangsu Normal University, China | Sep 2012 - Jun 2016 | Distinction

CERTIFICATIONS

Anthropic (6): Building with the Claude API, Intro to MCP, Intro to Agent Skills, Claude Code in Action, AI Fluency: Framework and Foundations, Claude Certified Architect (Foundations): practice exam passed
Other (50+ total): Google AI Essentials, Microsoft Azure AI Essentials, HackerRank Software Engineer plus 22 skill certifications

AWARDS AND RECOGNITION

- UN CSW 69 Speaker (by video link), UN Headquarters, New York, Mar 2025 — drew IBM pilot interest and an endorsement from Sierra Leone's Minister of Gender and Children's Affairs.
- Outstanding Mentor Award, Aotearoa AI Hackathon Festival, won in 2025 (1 of 14 mentors) and again in 2026, a second consecutive year; Excellence Award, FemTech China Women's Health Technology Challenge (Dec 2024); Outstanding Performer, UN Women FemTech Hackathon, Beijing (Mar 2025).
- Community: 530+ GitHub stars on own repos, 27 LinkedIn recommendations. Open-source contribution: 2 merged, maintainer-approved pull requests to CopilotKit.
