Introduction

Builds the AI software companies run every day — products with paying customers, private data, and regulated work behind them, not demos. Focus areas: **women's health, cultural technology, and early-stage startup infrastructure**. Works AI-native by default — directing coding agents (Claude Code, Codex) and building on the **Claude Agent SDK, MCP, and agent skills**, while keeping the call on what actually ships a human one — and publishing the work as open-source examples other teams build on.

How I Work

Hiring is a two-way match — so here's my half of it: how I work, and the teams I do my strongest work with.

I build with agents as the default layer, not an occasional assist.

My day is spent directing coding agents (Claude Code, Codex) and reviewing what they produce — I've moved from writing most code by hand to orchestrating it and owning the judgment calls. That shift is the whole point: when execution gets cheap, the work that matters is choosing what to build, framing the problem well, and having the taste to keep only what's worth keeping.

Professional AI tooling is infrastructure — and I treat it as a baseline.

A Claude Code or Codex subscription is foundational to how I work, the way a laptop and cloud access are. I read its honest cost the way Anthropic's own team does: not against a monthly SaaS line item, but against the engineer-hours it replaces. A team that equips its builders with first-class AI tooling has usually thought seriously about velocity; one that withholds it usually hasn't — so it's among the first things I look for.

I'm a builder who owns problems end to end, not a single lane on an org chart.

The clean split between “pure frontend”, “pure backend”, and “pure UI/UX” is a holdover from when one person couldn't reasonably hold all three. With agents, I can — and I'd rather own a problem from data model to interface to the assets that launch it than fill one box and hand off at every seam. I do my strongest work where authority follows the work, not the title.

I look for organisations that are AI-native by design, not by adoption.

Using AI tools and being AI-native aren't the same thing. The teams I do my best work with have rebuilt how the work actually flows — agents carry the routine execution, people show up for the judgment — instead of bolting AI onto a process designed for a pre-agent world. If that's the direction you're building in, we'll move fast together.

Selected Work – Proof of an AI-Native Builder

As an independent developer working directly with real clients, I own the whole delivery end to end — the app and the agent, the brand system, the documents, and the launch media — all as version-controlled code, with Claude Code as the multiplier. Every name below is a link you can open; a few of these are shown in the gallery that follows.

AI AGENTS & PRODUCTION APPS

Multi-agent systems that run in production — paying customers, sensitive data, guardrails enforced in code, not just prompts. The agent ships as the product, never a demo.

- [Tam-AI-Ti](#) — te-ao-Māori financial-wellness coach · bilingual voice coaching · 19-user, 4-month research cohort
- [FemTracker](#) — 8-node LangGraph agent, merged into CopilotKit's official demos
- [Vitex](#) — AI career agent: a job description → tailored résumé + cover letter in under 30s
- [ArchCanvas](#) — AI design agent for architects & self-builders · the paid product built on my own ArchLang · because the plan is a program, not a picture, it edits precisely where an image generator cannot · gpt-5.5 orchestration + GPT Image 2 renderings grounded on the compiled plan
- [Seismophone](#) — an independent observatory for AI music · trilingual

SKILLS, MCP SERVERS & DEVELOPER TOOLS

I package the workflows I rely on into reusable Claude Code skills, plugins and MCP servers — then open-source them for everyone.

- [ArchLang](#) — a floor-plan programming language I invented · turns a floor plan into a precise program, not a picture · the free open-source engine ArchCanvas is built on · zero-dependency TypeScript, on npm
- [academic-paper-review-skill](#) — dual-lens peer review → Markdown / Typst / PDF
- [app-promo-studio](#) — screenshots → cross-platform store & social images
- [logo-as-code-skill](#) — hand-drawn logo → editable SVG + favicons
- [typst-claude-skill](#) — Typst PDF generation; it typesets this CV

- [echook](#) — plain-English-configured notifications for AI coding assistants · Claude Code / Cursor / Codex · triple-OS CI
- [Google News](#) & [Google Jobs](#) MCP — among the earliest · 15+ catalogs

DESIGN SYSTEMS & BRAND

Whole design systems, not themes — tokens, type, motion, and a signature risograph texture — for my own brand and for paying clients.

- **Caldera** — the design system behind this CV: tokens, type, motion
- [Chow Luck Club](#) — event brand + site for a paying client (Tātaki Auckland Unlimited / Auckland Council)
- [gradient-svg-generator](#) — 355 animated-SVG templates for READMEs

DOCUMENTS AS CODE

As an independent developer with real clients, I write the paperwork too — all typeset as version-controlled Typst, reproducible, with no hosted doc-gen service.

- **Client contracts & staged receipts** — delivery paperwork generated and tracked as code
- **Conference agenda** — FemTech Weekend's 2026 Shanghai Summit programme
- **Speaker & Media Kit** — a press one-sheet for speaking
- **Peer-review reports & this CV** — my own Typst pipeline

MARKETING MEDIA — IMAGES & VIDEO

Launch media, also as code — promo graphics generated from the design system as HTML, and code-driven video in Remotion with AI voice and music. Zero Premiere, zero voice actors.

- [echook promo film](#) — 88-sec product film · Remotion + Claude Code + ElevenLabs + Suno
- **Promo graphics & OG covers** — HTML → branded images across every deployed project

TEAM AUTOMATION

I automate team operations end to end — a Slack ecosystem that retired volunteer chores.

- [She Sharp Slack ecosystem](#) — event bot, weekly digests, NZ-funding crawler + a sync-event-from-slack skill

Selected work, in the wild — real screenshots, with placeholders where more are coming.

Tam-AI-Ti — production app

Vitex — AI career agent

Chow Luck Club — client site

Client contract & receipts — Typst

echook promo film — Remotion

Experience

AI Agent Architect

Engram · May 2026 — Present
Albuquerque, New Mexico, United States · Remote

Recruited onto **Anthropic's Partner Network architect track** — Engram's founder asked his own Claude agent to surface candidates, and Chan's open-source portfolio was the pick (publicly confirmed by founder Luka Madzarac). Now in the 45-day Architect Cohort on the **Claude Certified Architect — Foundations** curriculum.

AI Instructor & Mentor

TechNest Community · Apr 2026 — Present
St John's, Newfoundland, Canada · Remote

Sole instructor of TechNest's first AI-specialised mentorship track — her **fifth teaching cohort since 2024**. Students arrive knowing only browser ChatGPT and, over 12 weeks, learn to build by directing coding agents, shipping a live multi-user AI product by the end. Also built the bilingual teaching platform that hosts it, including an in-course RAG assistant on Cloudflare Workers (Llama 3.1 8B + Vectorize + KV).

Founding Principal Engineer, Activation, Execution & AI Systems

GAVIGO Inc. · Oct 2025 — Present
Wilmington, Delaware, United States · **Remote**

Owns the intelligence layer of GAVIGO's app-activation platform — tap a game in a feed and it plays instantly, no app-store install. Built the AI scheduler that keeps content pre-warmed on Kubernetes (GKE) so a tapped game resumes in **under a millisecond** — already warm 84.6% of the time — and moved the platform across clouds (DigitalOcean → GCP) with zero downtime.

Promoted **Core Engineer** → **Founding Principal Engineer** across three renewals, building nearly the whole system solo.

Senior Full-Stack Engineer & Website Team Lead

She Sharp · Jul 2025 — Present
Auckland, New Zealand · **Hybrid**

Recruited by founder Dr Mahsa Mohaghegh to rebuild the member platform for **New Zealand's leading women-in-STEM charity (2,200+ registered members, 8,000+ women supported lifetime)**. Moved the community off a drag-and-drop website onto one system for sign-ups, events, and mentor matching — 10+ years of content carried over with **zero broken inbound links**, ~85% solo over a year. Mentors and mentees are paired by AI scoring (GPT-4o-mini, 5-dimensional) with human review.

Chief Technology Officer

FemTech Weekend · Mar 2025 — Present
Chengdu, Sichuan, China · **Remote**

Sole engineer behind **China's first women's-health-technology organisation** — built, then rebuilt its entire web platform twice as the mission grew, from a marketing site on Next.js to an editorial and research platform on Docusaurus. Ran the digital infrastructure for the **2026 Shanghai Summit** (June 22–25), a four-day event with **20 confirmed speakers** headlined by Ida Tin, who coined the term "FemTech".

Chief Technology Officer

Sanicle · Mar 2025 — Feb 2026
Tulsa, Oklahoma, United States · **Remote**

Joined as Senior AI/ML Infrastructure Engineer, promoted to CTO. Took Sanicle from a no-code prototype to the production B2B FemTech SaaS employers buy for their staff — menstrual and menopause workplace wellness. Personally integrated **IBM watsonx** into the product, the work that earned Sanicle its **IBM Silver Partner** certification.

Previously: ByteDance Full-Stack Engineer on the Douyin Mall capstone (Beijing, China · remote; Spring Boot 3 + solo Vue 3, 2 of 8 contributors) · **React Native full-stack mobile dev at CORDE Christchurch** (Canterbury, NZ · hybrid) · Forward With Her mentor (China · remote; 7 of 23 LinkedIn recs from this cohort).

Toolkit & Stack

CLAUDE CODE — EVERY EXTENSION SURFACE SHIPPED

CLAUDE.md Skills Subagents Hooks Status line Plugins

CODEX CLI — DAILY-DRIVER FLUENCY

AGENTS.md Sandbox + approvals Headless mode

AGENT SDKS & FRAMEWORKS

Claude Agent SDK OpenAI Agents SDK LangGraph LangChain CopilotKit Vercel AI SDK

HOW AGENTS CONNECT TO TOOLS & DATA

MCP (Model Context Protocol)

QUALITY & OBSERVABILITY

Vitest Cypress mcp-evals Lighthouse OpenTelemetry web-vitals

MODELS

Anthropic Opus / Sonnet / Haiku OpenAI gpt-5.5 / GPT-4o + realtime Gemini 2.x Llama 3.x

Speaking & Recognition

I speak and mentor in public — at the UN, at hackathons, and across the tech community. A few moments (more to come):

Keynote — AI Hackathon Festival 2025

Panel — She Sharp

Speaking — She Sharp

more to add

- **UN CSW 69 Speaker** — UN HQ NYC, Mar 2025 · attracted **IBM pilot interest** and an endorsement from Sierra Leone’s Minister of Gender and Children’s Affairs.
- **Outstanding Mentor Award** — AI Hackathon Festival 2025 · 1 of 14 expert mentors · guided 11 teams / 80+ participants.
- **Excellence Award** — FemTech China (Women’s Health Technology Challenge, Dec 2024).
- **UN Women FemTech Hackathon — Outstanding Performer** — FemTech Weekend, Beijing (Mar 2025).

Certifications & Training

Anthropic (6)

- **Building with the Claude API** · **Intro to MCP** · **Intro to Agent Skills** · **Claude Code in Action** (all May 2026; **Claude Code in Action** originally Aug 2025) · **AI Fluency: Framework & Foundations** (Aug 2025)
- **Claude Certified Architect — Foundations** curriculum completed (on the Anthropic Partner Network track via Engram)

Other AI / Cloud

- **Google AI Essentials** · **Microsoft Azure AI Essentials** · **Generative AI Career Skills** · **Wolfram Machine Learning Foundations** · **GitHub Professional** · **Docker Professional** · **Microsoft Software Development** (Dec 2024 — Aug 2025)

Engineering & platforms (50+ total)

- **HackerRank Software Engineer** + 22 skill certifications — **SQL (Advanced)** · Problem Solving · Go · Node.js · React · Angular
- **Microsoft** (Azure · System Administration · Project Management) · **C++ Institute** · **Anaconda Python** · **Atlassian Agile** · **Mozilla**

Education

Master of Applied Computing

Lincoln University — New Zealand

Nov 2023 — Dec 2024

Distinction (80%+) · Dean's List, Top 5%
