Introduction

Helps founders and mission-led teams get an AI product past the demo and into the hands of people who depend on it — work that has to hold up behind paying customers, private health data, and regulated processes. Ships MCP servers, sub-agents, and agent skills to production, most often in **women's health, cultural technology, and early-stage startup infrastructure**. Works AI-native by default — directing coding agents and building on the Claude Agent SDK — while keeping the call on what actually ships a human one.

Experience

Founder & Sole Engineer

ArchCanvas · Apr 2026 — Present
Auckland, New Zealand · **Remote**

Architects and self-builders describe a building in plain words and get back a dimensioned, buildable floor plan. When plans drawn as pictures proved impossible to check, invented **ArchLang**, the open-source language that compiles a plan into a precise drawing (**62 npm releases**, **139 diagnostic codes**), and rebuilt the product on it — so an edit is exact, not regenerated.
Built: archcanvas.uk · archlang.uk

Chief Technology Officer

FemTech Weekend · Mar 2025 — Present
Chengdu, Sichuan, China · **Remote**

China's first women's-health-technology organisation outgrew its web platform twice; rebuilt it both times as sole engineer, remotely. Built everything the 2026 Shanghai Summit ran on online, including an application system the founder reviews in batches: four days, **33 speakers**, headlined by Ida Tin.
Built: femtechweekend.com, both generations · the 2026 Summit pages and application system

Senior Full-Stack Engineer & Website Team Lead

She Sharp · Jul 2025 — Sep 2026
Auckland, New Zealand · **Hybrid**

A volunteer-run NZ women-in-STEM charity (**96+ events since 2014**) moved off rented software onto a system it owns: sign-ups, memberships, events, and GPT-4o-mini mentor matching a human approves. Recruited by founder Dr Mahsa Mohaghegh, led the build across **13.3 months**, including a **1,549-person** mailing-list cutover with **0 failures**. Rewrote the charity's recurring work — event setup, newsletters, posters, video — as **11 agent skills** a non-engineer can follow, so the handover was written down before leaving.
Built: shesharp.org.nz · the newsletter · the AI Hackathon deck

Founding Principal Engineer, Activation, Execution & AI Systems

GAVIGO Inc. · Oct 2025 — Oct 2026
Wilmington, Delaware, United States · **Remote**

Scroll a feed and the next game is already on standby, with no app-store install — built the Intelligence Layer behind GAVIGO's activation platform. Go orchestrator: a seven-trigger AI rules engine, a warm-pool manager and a five-state activation spine in Redis, on live Kubernetes (GKE) — in controlled proof-stage tests, **78% less application-level startup work** and a startup path cut from **4.45 s to 1.00 s** (not a production SLA), and a DigitalOcean → GCP move in a **30-minute cutover**. Built it solo; promoted Core Engineer → Founding Principal across three contracts.
Built: ire.gavigo.com, the live activation platform

What I Bring to a Team

- **Your AI feature survives contact with real users.** Compliance and money-handling steps guarded in code, not just in prompts.
- **Your latency and your AI spend stay predictable.** Model-tier routing with a measured fallback, prompt caching, and evaluation harnesses with documented failure modes.
- **Your customers' data stays separate, and stays theirs.** Per-customer isolation (multi-tenant), durable error handling, observability.
- **The decisions that are expensive to undo get made once.** Discovery-first planning, structured CI output, guardrails enforced in code rather than by instruction.
- **Everyone around you ships faster too.** Internal CLIs, IDE hooks, and MCP servers that compound across the engineering org.

AI Engineering & Tooling

CLAUDE CODE — SHIPPED SURFACES
CLAUDE.md · Skills · Subagents · Hooks · Status line · Plugins

CODEX CLI — DAILY DRIVER
AGENTS.md · Sandbox + approvals · Headless mode

WHAT I AUTOMATE BEYOND CODE
Typst PDFs · CI/CD pipelines · Slack apps · Agent teams · Code review · Internal CLIs

AGENT SDKS & FRAMEWORKS
Claude Agent SDK · OpenAI Agents SDK · LangGraph · LangChain · CopilotKit · Vercel AI SDK

PRODUCTION AI PATTERNS
MCP (Model Context Protocol) · RAG pipelines · Prompt caching · Multi-agent orchestration · JSON Schema outputs · Model-tier routing + fallback

QUALITY & OBSERVABILITY
Vitest · Cypress · mcp-evals · Lighthouse · OpenTelemetry · web-vitals

AI Instructor & Mentor
TechNest Community · Apr 2026 — Aug 2026
St John's, Newfoundland, Canada · **Remote**

30 students graduated and shipped 6 deployed multi-user AI products in 12 weeks: they arrived knowing only browser ChatGPT and left able to build by directing coding agents. Sole instructor of TechNest's first AI-specialised track, and a **fifth teaching cohort since 2024**.

Chief Technology Officer
Sanicle · Mar 2025 — Feb 2026
Tulsa, Oklahoma, United States · **Remote**

A US women's-health startup needed its product off a no-code prototype and into IBM's partner network. Promoted from Senior AI/ML Infrastructure Engineer to CTO leading a **team of five**; rebuilt it as a multi-tenant B2B SaaS for employees and HR teams, and built the IBM watsonx integration and live demo behind Sanicle's **IBM Silver Partner** certification.
Built: the company website (Next.js) and the IBM watsonx demo app

Previously: AI Agent Architect at Engram (Albuquerque, NM · remote; recruited onto **Anthropic's Partner Network architect track** after founder Luka Madzarac's own Claude agent surfaced Chan's open-source portfolio — publicly confirmed by him; credentials behind Engram's Partner Network approval) · **ByteDance backend developer** (Douyin Mall capstone, Youth Training Camp; Spring Boot 3) · **full-stack developer & lead documenter at CORDE** (Canterbury, NZ; offline-first React Native field app; 236 of 413 commits on the original repository, the largest share) · **Forward With Her mentor** (China · remote; 7 of 27 LinkedIn recommendations).

Selected Projects & Products

Google News MCP Server github.com/ChanMeng666/server-google-news
One of the earliest MCP servers — live Google News for AI assistants, shipped 35 days after Anthropic's Nov 2024 MCP launch.

- **Shipped before MCP had a registry**, so listed by hand across 15+ catalogs — a first-mover position that compounded into a PulseMCP "Top Pick", a Glama A-rating and **129 GitHub stars**.

echook github.com/ChanMeng666/echook
An AI-operated hooks plugin for **Claude Code, Cursor IDE and Codex CLI**, installed and driven entirely in natural language.

- Audio notifications grew into a **context-window status line** and session telemetry — the production work behind shipping **four** Claude Code extension surfaces: hooks, skills, status line and plugin packaging.

AI Programming Education Platform programming.chanmeng.org/
Bilingual platform holding **three years of cohorts as five versions side by side, three concurrent in 2026** — taught from by **TechNest's 2026 AI Track** and **academyEX's Her Waka**, and built and maintained solo.

- **In-course RAG assistant on Cloudflare Workers** (Llama 3.1 8B + Vectorize + KV) over **~1,200 chunks, version-aware**, so each student is answered from their own cohort's material; restored and rate-limited after a model retirement.
- **Mentorship at scale:** Demo Day ends in a **public Capstone Showcase** of student products (CreditHero, iCare, JobOrg-AI), with guest voting.

a11y-loop github.com/ChanMeng666/a11y-loop
A Claude Code skill plus CLI that makes AI coding agents write accessible UI by default, then checks it in a real browser · Playwright + axe-core against WCAG 2.2 AA · on npm, MIT.

- **Honest by design:** it audits the interaction states the agent built, not one static snapshot, and lists what automation could **not** check — so a green run never claims WCAG coverage it has no standing to claim.
- **Being adopted by My Life My Voice**, the disability-led NZ organisation that set the accessible-UI challenge at the Aotearoa AI Hackathon 2026, after a live walkthrough with its CTO.

Also built: eatropolis.co.nz (Auckland's official culinary festival, for Chow Luck Club Ltd with council agency Tātaki Auckland Unlimited) · Tam-AI-Ti (AI financial-wellness app built around te ao Māori; a 19-user cohort over 4 months).

Stack

MODELS
Claude Opus 5 / Sonnet 5 / Haiku 4.5 · OpenAI gpt-5.5 / GPT-4o + realtime · Gemini 2.x · Llama 3.x

APP FRAMEWORKS
Next.js 16 · React · Vue 3 · Spring Boot 3 · FastAPI · TailwindCSS · Drizzle ORM · Zod

INFRA & DATA
Kubernetes GKE · Cloudflare Workers + Vectorize · Neon Postgres + pgvector · Supabase · Docker + Traefik · Redis · Stripe · Stack Auth · NextAuth 5

LANGUAGES
TypeScript · Python · Go · Java · SQL · Typst

Certifications & Training

Anthropic (6 · 2025—2026)

- **Building with the Claude API · Intro to MCP · Intro to Agent Skills · Claude Code in Action · AI Fluency: Framework & Foundations**
- **Claude Certified Architect — Foundations** — curriculum completed, practice exam passed; Anthropic Partner Network track via Engram

Other AI / Cloud (2024—2025)

- **Google AI Essentials · Microsoft Azure AI Essentials · Generative AI Career Skills · Wolfram Machine Learning Foundations · GitHub Professional · Docker Professional · Microsoft Software Development**

Engineering & platforms (50+ total)

- **HackerRank Software Engineer** + 22 skill certifications — **SQL (Advanced)** · Problem Solving · Go · Node.js · React · Angular · **Microsoft** (Azure · System Administration · Project Management) · **C++ Institute** · **Anaconda Python** · **Atlassian Agile** · **Mozilla**

Recognition

- **UN CSW 69 Speaker** — UN HQ NYC, Mar 2025 · presented by video link · attracted **IBM pilot interest** and an endorsement from Sierra Leone's Minister of Gender and Children's Affairs.
- **Outstanding Mentor Award** — Aotearoa AI Hackathon Festival, **two years running** (2025: 1 of 14 expert mentors, 11 teams / 80+ participants · 2026: 12 teams, 125 registered, MC'd the opening).
- **Excellence Award** — FemTech China (Women's Health Technology Challenge, Dec 2024).
- **UN Women FemTech Hackathon — Outstanding Performer** — FemTech Weekend, Beijing (Mar 2025).

Education

Master of Applied Computing
Lincoln University — New Zealand
Nov 2023 — Dec 2024
Distinction (80%+) · Dean's List, Top 5%
