

Chan Meng

AI Agent Architect | Full-stack Engineer | AI Tooling Engineer
chanmeng.career@gmail.com | +64 28 8510 9245 | Auckland, New Zealand
chanmeng.org | linkedin.com/in/chanmeng666 | github.com/ChanMeng666

PROFESSIONAL SUMMARY

AI and full-stack engineer who has shipped MCP servers, sub-agents, and agent skills to production, behind paying customers, private health data, and regulated work, not demos. Has run five concurrent engineering and CTO-level roles across four countries. Works AI-native by default, directing coding agents and building on the Claude Agent SDK.

TECHNICAL SKILLS

AI and agent engineering: Claude Agent SDK, OpenAI Agents SDK, Model Context Protocol (MCP), LangGraph, LangChain, CopilotKit, Vercel AI SDK, RAG pipelines, multi-agent orchestration, JSON Schema outputs, prompt caching, model-tier routing with fallback, evaluation harnesses, mcp-evals
Languages and frameworks: TypeScript, Python, Go, Java, SQL, Next.js 16, React, React Native, Vue 3, Spring Boot 3, FastAPI, TailwindCSS, Drizzle ORM, Zod
Claude Code and Codex CLI: CLAUDE.md, Agent Skills, Subagents, Hooks, Status line, Plugins, AGENTS.md, sandbox and approval policies, headless mode
Models: Anthropic Claude Opus 5, Sonnet 5, Haiku 4.5, OpenAI gpt-5.5, GPT-4o, realtime, Gemini, Llama
Infrastructure, data, and quality: Neon Postgres, Supabase, Redis, Cloudflare Workers, Docker, Stripe, NextAuth 5, Vitest, Cypress, web-vitals, OpenTelemetry, multi-tenant isolation, CI/CD pipelines

PROFESSIONAL EXPERIENCE

Founder & Sole Engineer

ArchCanvas | Auckland, New Zealand | Remote | Apr 2026 – Present

- Build an AI design agent for architects and self-builders: invented ArchLang, the open-source language that compiles a floor plan into a dimensioned drawing (34 npm releases, 83 diagnostic codes), then built the commercial product on top so an edit is exact and replayable rather than regenerated.

Senior Full-Stack Engineer & Website Team Lead

She Sharp | Auckland, New Zealand | Hybrid | Jul 2025 – Present

- Recruited by founder Dr Mahsa Mohaghegh to move a volunteer-run New Zealand women-in-STEM charity (96+ events since 2014) off rented software onto infrastructure it owns: one system for sign-ups, memberships, events, and mentor matching scored by GPT-4o-mini across five weighted dimensions with a rule-based fallback, at 1,381 commits, 251 merged pull requests and 94.5% of all lines added across 13.3 months.
- Rewrote the charity's recurring work as 11 agent skills, 25,643 lines of written-down procedure, version-controlled and type-checked in CI, so non-engineers now run work that used to need an engineer.

Chief Technology Officer

FemTech Weekend | Chengdu, Sichuan, China | Remote | Mar 2025 – Present

- Sole engineer behind China's first organisation built around women's health technology, across two platform generations (Next.js, then Docusaurus), and ran the digital infrastructure for the 2026 Shanghai Summit: four days, 20 speakers, headlined by Ida Tin, who coined the term FemTech.

Founding Principal Engineer, Activation, Execution & AI Systems

GAVIGO Inc. | Wilmington, Delaware, United States | Remote | Oct 2025 – Sep 2026

- Owned the Intelligence Layer of an app-activation platform: a Go orchestrator running a seven-trigger AI rules engine, a warm-pool manager and a five-state activation spine in Redis, on live Kubernetes (GKE): sub-millisecond p50 restore, an 84.6% warm-pool hit rate and zero errors at 100 concurrent WebSocket clients; migrated DigitalOcean to Google Cloud in a 30-minute cutover; promoted from Core Engineer across three contracts, 471 of 488 commits solo.

AI Instructor & Mentor

TechNest Community | St John's, Newfoundland, Canada | Remote | Apr 2026 – Aug 2026

- Sole instructor of TechNest's first AI track, its fifth cohort since 2024: in 12 weeks students went from browser ChatGPT to directing coding agents, and 30 graduated having shipped 6 multi-user AI products.

- Authored the bilingual platform hosting all five cohorts (211 of 220 commits) and its RAG assistant.

AI Agent Architect

Engram | Albuquerque, New Mexico, United States | Remote | May 2026 – Jul 2026

- Recruited onto Anthropic's Partner Network architect track when the founder's Claude agent surfaced this portfolio; completed the 45-day Architect Cohort, contributing to its agent, skill and MCP conventions.

Chief Technology Officer

Sanicle | Tulsa, Oklahoma, United States | Remote | Mar 2025 – Feb 2026

- Joined as Senior AI/ML Infrastructure Engineer and was promoted to CTO; took the product from a no-code prototype to a multi-tenant B2B FemTech SaaS and integrated IBM watsonx behind a Gemini fallback, the work that earned Sanicle its IBM Silver Partner certification.

Earlier experience

Technology & Professional Development Mentor, Forward with Her | China | Oct 2024 – Sep 2025

Backend Developer, ByteDance | China | Nov 2024 – Mar 2025

Full Stack Developer & Lead Documenter, CORDE | Canterbury, New Zealand | Jun 2024 – Nov 2024

PROJECTS

Tam-AI-Ti | tamaiti.whiri-ai.com

A bilingual te reo Māori and English AI financial-wellness app, built solo on commission from Riria (Missy) Te Kanawa personally, not her employer ASB Bank: three composed OpenAI models, one a realtime voice coach, and culture as typed schema (Maramataka phases, Te Whare Tapa Whā domains); a 19-user cohort produced 181 journal entries over 4 months.

Vitex – AI Career Agent | vitex.org.nz

Paste a job description, get a tailored resume and cover letter scored against its keywords in under 30 seconds, with Typst compiling the finished PDF locally in under 100 ms across 7 templates.

Google News MCP Server | github.com/ChanMeng666/server-google-news

An earliest-ecosystem Model Context Protocol server, shipped 35 days after Anthropic launched MCP and before a registry existed: a PulseMCP Top Pick, a Glama A-rating, and 126 GitHub stars.

echook | github.com/ChanMeng666/echook

An AI-operated hooks plugin for Claude Code, Cursor IDE and Codex CLI, installed and driven entirely in natural language, grown from audio notifications into a context-window status line and richer session telemetry: the production work behind having shipped every Claude Code extension surface.

Also built: eatropolis.co.nz (Auckland's official culinary festival, commissioned by Chow Luck Club Ltd with Auckland Council's agency Tātaki Auckland Unlimited as event partner), gradient-svg-generator (355 SVG templates), a11y-loop (an accessibility CLI and Claude Code skill, validated and taken up by the disability-led New Zealand organisation that set the problem), and Seismophone (the first public Suno remix-lineage explorer).

EDUCATION

Master of Applied Computing, Lincoln University, New Zealand | Nov 2023 – Dec 2024 | Distinction, Dean's List (Top 5%)

Bachelor of Geography Science, Jiangsu Normal University, China | Sep 2012 – Jun 2016 | Distinction

CERTIFICATIONS

Anthropic (6, 2025–2026): Building with the Claude API, Intro to MCP, Intro to Agent Skills, Claude Code in Action, AI Fluency: Framework and Foundations, Claude Certified Architect (Foundations): practice exam passed, Partner Network track

Other (50+ total): Google AI Essentials, Microsoft Azure AI Essentials, HackerRank Software Engineer plus 22 skill certifications

AWARDS AND RECOGNITION

- UN CSW 69 Speaker (by video link), UN Headquarters, New York, Mar 2025 — drew IBM pilot interest and an endorsement from Sierra Leone's Minister of Gender and Children's Affairs.
- Outstanding Mentor Award, Aotearoa AI Hackathon Festival, won in 2025 (1 of 14 mentors) and again in 2026, a second consecutive year; Excellence Award, FemTech China Women's Health Technology Challenge (Dec 2024); Outstanding Performer, UN Women FemTech Hackathon, Beijing (Mar 2025).
- Community: 480+ GitHub stars on own repos, 26 LinkedIn recommendations, 2 merged CopilotKit PRs.
