Introduction

Ships MCP servers, sub-agents, and agent skills to production — behind paying customers, private health data, and regulated work, not demos. Focus areas: **women's health, cultural technology, and early-stage startup infrastructure**. Works AI-native by default — directing coding agents (Claude Code, Codex) and building on the Claude Agent SDK, while keeping the call on what actually ships a human one.

Experience

Founder & Sole Engineer

ArchCanvas · Apr 2026 — Present
Auckland, New Zealand · Remote

Builds an AI design agent for architects and self-builders — describe a building in plain words, get a dimensioned, buildable floor plan. Invented **ArchLang**, the open-source language that compiles a floor plan into a precise drawing (**34 npm releases, 83 diagnostic codes**), then built the commercial product on top — so an edit is exact and replayable, not regenerated.

Senior Full-Stack Engineer & Website Team Lead

She Sharp · Jul 2025 — Present
Auckland, New Zealand · Hybrid

Recruited by founder Dr Mahsa Mohaghegh to move a volunteer-run New Zealand women-in-STEM charity (**96+ events since 2014**) off rented software and onto infrastructure it owns: one system for sign-ups, memberships, events, and mentor matching scored by GPT-4o-mini across five weighted dimensions with a rule-based fallback and human review. **1,381 commits, 251 merged pull requests and 94.5% of all lines added across 13.3 months**. Then rewrote the charity's recurring work as **11 agent skills — 25,643 lines of written-down procedure**, version-controlled and type-checked in CI, so non-engineers now run work that used to need an engineer.

Chief Technology Officer

FemTech Weekend · Mar 2025 — Present
Chengdu, Sichuan, China · Remote

Sole engineer behind China's first women's-health-technology organisation — rebuilt its entire web platform twice as the mission grew, from a Next.js marketing site to a Docusaurus editorial and research platform. Ran the digital infrastructure for the 2026 Shanghai Summit, a four-day event with **20 confirmed speakers** headlined by Ida Tin, who coined the term "FemTech".

Founding Principal Engineer, Activation, Execution & AI Systems

GAVIGO Inc. · Oct 2025 — Sep 2026
Wilmington, Delaware, United States · Remote

Owned the Intelligence Layer of GAVIGO's app-activation platform — tap a game in a feed and it plays instantly, no app-store install. Built the Go orchestrator behind it: a seven-trigger AI rules engine, a warm-pool manager and a five-state activation spine in Redis, measured on live Kubernetes (GKE) at **sub-millisecond p50 restore**, an **84.6% warm-pool hit rate** and **zero errors at 100 concurrent WebSocket clients**, then moved DigitalOcean → GCP in a **30-minute cutover**. Promoted Core Engineer → Founding Principal Engineer across three contract iterations, **471 of 488 commits** solo.

What I Bring to a Team

- **Ship production AI agents that hold up under real use.** Compliance and money-handling steps guarded in code, not just prompts.
- **Keep AI fast and economical in production.** Evaluation harnesses with documented failure modes.
- **Keep every customer's data separate and safe.** Per-customer isolation (multi-tenant), durable error handling, observability.
- **Senior judgement on the calls that are hard to reverse.** Discovery-first planning, structured CI output, guardrails enforced in code rather than by instruction.
- **Make the whole team faster.** Internal CLIs, IDE hooks, and MCP servers that compound across the engineering org.

AI Engineering & Tooling

CLAUDE CODE — EVERY SURFACE SHIPPED

CLAUDE.md Skills Subagents Hooks
Status line Plugins

CODEX CLI — DAILY DRIVER

AGENTS.md Sandbox + approvals
Headless mode

WHAT I AUTOMATE BEYOND CODE

Typst PDFs CI/CD pipelines Slack apps
Agent teams Code review Internal CLIs

AGENT SDKS & FRAMEWORKS

Claude Agent SDK OpenAI Agents SDK
LangGraph LangChain CopilotKit
Vercel AI SDK

PRODUCTION AI PATTERNS

MCP (Model Context Protocol) RAG pipelines
Prompt caching Multi-agent orchestration
JSON Schema outputs
Model-tier routing + fallback

QUALITY & OBSERVABILITY

Vitest Cypress mcp-evals Lighthouse
OpenTelemetry web-vitals

AI Instructor & Mentor

TechNest Community · Apr 2026 — Aug 2026
St John's, Newfoundland, Canada · Remote

Sole instructor of TechNest's first AI-specialised track, her **fifth teaching cohort since 2024**: students arrived knowing only browser ChatGPT and, over 12 weeks, learned to build by directing coding agents — **30 graduated** and shipped **6 deployed multi-user AI products**. Also built the bilingual platform that hosts it (**211 of 220 commits**), with an in-course RAG assistant on Cloudflare Workers.

AI Agent Architect

Engram · May 2026 — Jul 2026
Albuquerque, New Mexico, United States · Remote

Recruited onto **Anthropic's Partner Network architect track** — Engram's founder asked his own Claude agent to surface candidates, and Chan's open-source portfolio was the pick (publicly confirmed by founder Luka Madzarac). Spent the 45-day Architect Cohort on its agent, skill and MCP-integration conventions.

Previously: **CTO at Sanicle** (Tulsa, OK · remote; promoted from Senior AI/ML Infrastructure Engineer; the IBM watsonx integration behind Sanicle's **IBM Silver Partner** certification) · **ByteDance backend developer** on the Douyin Mall capstone (Youth Training Camp; Spring Boot 3) · **full-stack developer & lead documenter at CORDE** (Canterbury, NZ · hybrid; offline-first React Native field app, #1 contributor) · **Forward With Her mentor** (China · remote; 7 of 26 LinkedIn recommendations come from this cohort).

Selected Projects & Products

Tam-AI-Ti tamaiti.whiri-ai.com/

An AI financial-wellness app for Māori communities, built around te ao Māori — an independent research commission from Riria (Missy) Te Kanawa personally (former KPMG NZ National Māori Sector lead; now Māori Executive Lead at ASB Bank, which was not a party to this commission).

- **A research question, not a spec**: can technology built natively on Māori culture engage a population that culturally-decorated technology does not? Built solo — a bilingual voice-and-journaling app where the culture is typed data in the database (Maramataka phases, Te Whare Tapa Whā domains), not labels bolted on.
- The evidence: a **19-user cohort over 4 months** produced 181 bilingual journal entries and 74 daily check-ins — sustained engagement for a pilot with no marketing.

Vitex — AI Career Agent www.vitex.org.nz/

Paste a job description, get a tailored resume and cover letter scored against the job's keywords in under 30 seconds · sole-authored over ~18 months · Vercel AI SDK + gpt-5.5 / gpt-5.4-mini + Typst.

- The resume assembles live instead of behind a spinner, and **Typst compiles the finished PDF locally in under 100 ms** across 7 templates — no hosted Chromium or outside doc service.
- **Metered around the product, not the clock** — a run counts only after a PDF compiles, so a failed retry is a non-event. Built for the NZ / AU / APAC market Chan needed; three migrations, zero downtime.

Google News MCP Server glama.ai/mcp/servers/ChanMeng666/server-google-news

Earliest-ecosystem MCP server — gives AI assistants live Google News access. Shipped 35 days after Anthropic's Nov 2024 MCP launch.

- **Shipped before MCP had a registry** — 35 days after the standard launched — so it was listed by hand across 15+ catalogs. The first-mover position compounded: a PulseMCP "Top Pick", a Glama A-rating, and 126 GitHub stars.

echook github.com/ChanMeng666/echook

An AI-operated hooks plugin for **Claude Code**, **Cursor IDE** and **Codex CLI** — installed, configured and driven entirely in natural language.

- Started as audio notifications, now a **context-window status line** and session telemetry — the production work behind having shipped **every** Claude Code extension surface: CLAUDE.md, hooks, status line, plugins.

Also built: eatropolis.co.nz (Auckland's official culinary festival, commissioned by Chow Luck Club Ltd with council agency Tātaki Auckland Unlimited as event partner) · [a11y-loop](#) (accessibility CLI adopted by a disability-led NZ organisation) · [Seismophone](#) (first public Suno remix-lineage explorer) · [gradient-svg-generator](#) (355 SVG templates).

Certifications & Training

Anthropic (6 · 2025–2026)

- **Building with the Claude API** · Intro to MCP · Intro to Agent Skills · Claude Code in Action · AI Fluency: Framework & Foundations
- **Claude Certified Architect — Foundations** — curriculum completed, practice exam passed; Anthropic Partner Network track via Engram

Other AI / Cloud (2024–2025)

- Google AI Essentials · Microsoft Azure AI Essentials · Generative AI Career Skills · Wolfram Machine Learning Foundations · GitHub Professional · Docker Professional · Microsoft Software Development

Engineering & platforms (50+ total)

- **HackerRank Software Engineer** + 22 skill certifications — SQL (Advanced) · Problem Solving · Go · Node.js · React · Angular · Microsoft (Azure · System Administration · Project Management) · C++ Institute · Anaconda Python · Atlassian Agile · Mozilla

Recognition

- **UN CSW 69 Speaker** — UN HQ NYC, Mar 2025 · presented by video link · attracted **IBM pilot interest** and an endorsement from Sierra Leone's Minister of Gender and Children's Affairs.
- **Outstanding Mentor Award** — Aotearoa AI Hackathon Festival, **two years running** (2025: 1 of 14 expert mentors, 11 teams / 80+ participants · 2026: 12 teams, 125 registered, MC'd the opening).
- **Excellence Award** — FemTech China (Women's Health Technology Challenge, Dec 2024).
- **UN Women FemTech Hackathon — Outstanding Performer** — FemTech Weekend, Beijing (Mar 2025).

Education

Master of Applied Computing

Lincoln University — New Zealand
Nov 2023 — Dec 2024
Distinction (80%+) · Dean's List, Top 5%
