Introduction

Builds production AI systems used by real teams every day — handling paying customers, sensitive data, and regulated workflows, not demos. Focus areas: **women's health, cultural technology, and early-stage startup infrastructure**. Daily-driver of the same **Claude Agent SDK, MCP, and agent-skills** stack used inside Anthropic's Partner Network — already shipping these as open-source reference implementations.

Experience

AI Agent Architect

[Engram](#) · May 2026 — Present

Recruited onto **Anthropic's Partner Network architect track** — the founder used his own Claude agent to surface candidates, Chan's open-source portfolio was the recommendation (publicly confirmed). 45-day Architect Cohort: **Claude Certified Architect — Foundations** curriculum.

AI Instructor & Mentor

[TechNest Community](#) · Apr 2026 — Present

Built and sole-teaches TechNest's first AI-specialised mentorship track — **12-week prompt-first curriculum, students ship portfolio-grade AI apps by week 8**. Also built the bilingual teaching platform 95.7% solo, including an in-course RAG assistant on Cloudflare Workers (Llama 3.1 8B + Vectorize + KV).

Founding Principal Engineer, Activation, Execution & AI Systems

[GAVIGO Inc.](#) · Oct 2025 — Present

Promoted **Core Engineer → Founding Principal Engineer across three contract iterations** — owns the Intelligence Layer of GAVIGO's sub-millisecond app activation platform (lets users open straight into a game without an app-store install). **p50 < 1 ms activation latency · 84.6% warm-pool hit rate** · cross-cloud DigitalOcean → GCP GKE migration in a **30-minute zero-downtime cutover · 98% solo on 353 commits**.

Senior Full-Stack Engineer & Website Team Lead

[She Sharp](#) · Jul 2025 — Present

Recruited by founder Dr Mahsa Mohaghegh to rebuild **New Zealand's leading women-in-STEM platform (2,200+ registered members, 8,000+ women supported lifetime)** · Webflow → Next.js cutover **86.6% solo across 10 months**, 10+ years of legacy content preserved with **zero broken inbound links**, AI mentor-matching engine (GPT-4o-mini, 5-dimensional scoring) shipped on top.

Chief Technology Officer

[FemTech Weekend](#) · Mar 2025 — Present

Sole technical lead for **China's first FemTech organisation** since its inaugural conference — built and rebuilt the entire web platform twice (Next.js Gen-1 → Docusaurus Gen-2 editorial rewrite). Currently operating the **2026 Shanghai Summit, 16 confirmed speakers including FemTech-term originator Ida Tin**.

Previously: CTO at [Sanicle](#) (prev. Senior AI/ML Infrastructure Engineer) — earned the company its **IBM Silver Partner** certification through a solo build (350+ commits) · **ByteDance Full-Stack Engineer** on the Douyin Mall capstone (Spring Boot 3 + solo Vue 3, 2 of 8 contributors) · **React Native full-stack mobile dev** at [CORDE Christchurch](#) · [Forward With Her](#) mentor (7 of 18 LinkedIn recs from this cohort).

What I Bring to a Team

- **Ship production AI agents that don't fall over.** Multi-agent systems with hard guardrails enforced in code — not just prompts — for compliance and financial steps.
- **Keep AI cost and latency predictable.** Prompt caching, model-tier routing, evaluation harnesses with documented failure modes — not hype.
- **Multi-tenant SaaS without context bleed.** Scoped sessions per customer, durable error handling, observability.
- **Senior judgement on architectural calls.** Discovery-first planning before coding · structured CI output · deterministic code-level guardrails over prompt instructions.
- **Multiply team velocity.** Internal CLIs, IDE hooks, and MCP servers that compound across the engineering org.

Stack

Selected Open-Source Projects

Tam-AI-Ti tamaiti.whiri-ai.com/

An AI financial-wellness app built around te ao Māori — the user's culture lives in the data model, not just the translation layer · commissioned solo by Riria (Missy) Te Kanawa (ASB Bank · former KPMG NZ National Māori Sector lead).

- 351 commits solo · 48 tables / 494 columns / 22 migrations · 3-model OpenAI composition (gpt-4o-mini coach turns + gpt-4o synthesis + gpt-4o-realtime-preview voice).
- **Schema-first te reo Māori** — Maramataka lunar phases and Te Whare Tapa Whā wellness domains live as first-class Drizzle enum types, not UI labels (prevents the “i18n drift” where cultural concepts decay into English-only columns).
- **19-user research cohort sustained 4 months** · 181 bilingual journal entries · 35 voice sessions · 146 AI coach messages · 74 daily check-ins.

echook — claude-code-audio-hooks [github.com/](https://github.com/ChanMeng666/echook)

[ChanMeng666/echook](https://github.com/ChanMeng666/echook)

A noise-control system for AI coding assistants — turns down their constant audio chatter during deep work, alerts only on the things that matter.

- **Reference implementation of the Claude Agent SDK hooks lifecycle** — PreToolUse · PostToolUse · status line · context-window quota. 26 hook events · 42 releases · 139 tests on triple-platform CI (Linux / macOS / Windows).
- **Cross-tool by design** — single hook system, three IDE surfaces: Claude Code, Cursor, OpenAI Codex.
- Started as an internal noise-fix for long-running background agents; open-sourced after teammates asked for it; now community-adopted across all three IDEs.

Vitex — AI Career Agent www.vitex.org.nz/

Paste a job description, get a tailored resume + cover letter scored against the JD's keywords in under 30 seconds · 95% solo · 168 commits · Vercel AI SDK + GPT-4o + Typst.

- **7-step AI pipeline streaming over SSE** (JD parsing → background → match analysis → resume tailoring → ATS scoring → cover letter → Typst doc generation) · every stage Zod-validated structured output · disables OpenAI strict-JSON mode on .optional() Zod schemas.
- **Typst compiles PDFs locally in under 100 ms** across 14 AI-auto-selected templates — no hosted Chromium, no third-party doc-gen API.
- **Three production migrations** (Railway → Cloudflare Workers → DigitalOcean VPS) + LaTeX → Typst engine swap, zero downtime · Docker + Traefik + GitHub Actions CD · Stripe credits ledger + share-token URLs.

Google News MCP Server [glama.ai/mcp/servers/ChanMeng666/](https://glama.ai/mcp/servers/ChanMeng666/server-google-news)

[server-google-news](https://glama.ai/mcp/servers/ChanMeng666/server-google-news)

Earliest-ecosystem MCP server — gives AI assistants live Google News access. Shipped 35 days after Anthropic's Nov 2024 MCP launch.

- **Featured in Skywork AI's AI-engineer deep-dive guide** — listed across **15+ MCP catalogs** · PulseMCP “Top Pick” · Glama A-rating · 122 stars · @chanmeng666/google-news-server on npm.
- **Shipped before MCP had a registry** — built own discovery story (PulseMCP + Glama + npm submissions), compounding into first-mover index advantage as catalogs came online.

Also built: eatropolis.co.nz (solo 9-day commercial event platform for Chow Luck Club × Tātaki Auckland Unlimited / Auckland Council) · [gradient-svg-generator](https://gradient-svg-generator.com) (340+ animated-SVG templates, 273 solo commits) · [typst-claude-skill](https://typst-claude-skill.com) (official Typst skill for Claude Code — typesets this CV) · [SunoStats](https://suno-stats.com) (industry's first Suno music lineage explorer · trilingual English / Simplified Chinese / Japanese) · [FanFic Lab](https://fanfic-lab.com) (7-node LangGraph agent).

Certifications & Training

Anthropic (6)

- **Building with the Claude API** · Intro to MCP · Intro to Agent Skills · Claude Code in Action (all May 2026; Claude Code in Action originally Aug 2025) · **AI Fluency: Framework & Foundations** (Aug 2025)
- **Claude Certified Architect — Foundations** curriculum completed (on Anthropic Partner Network track via Engram)

Other AI / Cloud

- **Google AI Essentials** · **Microsoft Azure AI Essentials** · **Generative AI Career Skills** · **Wolfram Machine Learning Foundations** · **GitHub Professional** · **Docker Professional** · **Microsoft Software Development** (Dec 2024 — Aug 2025)

Engineering & platforms (50+ total)

- **HackerRank Software Engineer** + 22 skill certifications — **SQL (Advanced)** · Problem Solving · Go · Node.js · React · Angular
- **Microsoft** (Azure · System Administration · Project Management) · **C++ Institute** · **Anaconda Python** · **Atlassian Agile** · **Mozilla**

Recognition

- **UN CSW 69 Speaker** — UN HQ NYC, Mar 2025 · attracted **IBM pilot interest** and an endorsement from Sierra Leone's Minister of Gender and Children's Affairs.
- **Outstanding Mentor Award** — AI Hackathon Festival 2025 · 1 of 14 expert mentors · guided 11 teams / 80+ participants.
- **Excellence Award** — FemTech China (Women's Health Technology Challenge, Dec 2024).
- **UN Women FemTech Hackathon — Outstanding Performer** — FemTech Weekend, Beijing (Mar 2025).

Education

Master of Applied Computing

Lincoln University — New Zealand

Nov 2023 — Dec 2024

Distinction (80%+) · Dean's List, Top 5%
