

Chan Meng

AI Agent Architect | Full-stack Engineer | AI Tooling Engineer
chanmeng.career@gmail.com | +64 28 8510 9245 | Auckland, New Zealand
chanmeng.org | linkedin.com/in/chanmeng666 | github.com/ChanMeng666

PROFESSIONAL SUMMARY

Full-stack and AI engineer building production software with paying customers, private data, and regulated work behind it, not demos. Five concurrent engineering and CTO-level roles across four countries, in women's health technology, cultural technology, and startup infrastructure. Works AI-native by default: directs coding agents and builds on the Claude Agent SDK, Model Context Protocol (MCP), and agent skills.

TECHNICAL SKILLS

Languages and frameworks: TypeScript, Python, Go, Java, SQL, Typst, Next.js 16, React, React Native, Vue 3, Spring Boot 3, FastAPI, TailwindCSS, Drizzle ORM, Zod

AI and agent engineering: Claude Agent SDK, OpenAI Agents SDK, Model Context Protocol (MCP), LangGraph, LangChain, CopilotKit, Vercel AI SDK, RAG pipelines, prompt caching, model-tier routing, evaluation harnesses, mcp-evals

Claude Code and Codex CLI (every extension surface shipped): CLAUDE.md, Agent Skills, Subagents, Hooks, Status line, Plugins, AGENTS.md, sandbox and approval policies, headless mode

Models: Anthropic Claude Opus, Sonnet, Haiku, OpenAI gpt-5.5, GPT-4o and realtime, Google Gemini 2.x, Meta Llama 3.x

Infrastructure, data, and quality: Kubernetes (GKE), Cloudflare Workers and Vectorize, Neon Postgres, pgvector, Supabase, Redis, Docker, Stripe, NextAuth 5, Vitest, Cypress, Lighthouse, web-vitals, OpenTelemetry, multi-tenant isolation, zero-downtime cloud migration, CI/CD pipelines

PROFESSIONAL EXPERIENCE

AI Agent Architect

Engram | Albuquerque, New Mexico, United States | Remote | May 2026 – Present

- Recruited onto Anthropic's Partner Network architect track after the founder's Claude agent surfaced this open-source portfolio; now in the 45-day Architect Cohort on the Claude Certified Architect: Foundations curriculum.

AI Instructor & Mentor

TechNest Community | St John's, Newfoundland, Canada | Remote | Apr 2026 – Present

- Sole instructor of TechNest's first AI-specialised mentorship track, the fifth teaching cohort delivered since 2024; over 12 weeks students go from browser ChatGPT to shipping a live multi-user AI product by directing coding agents. Also built the bilingual platform that hosts it, with an in-course RAG assistant on Cloudflare Workers.

Founding Principal Engineer, Activation, Execution & AI Systems

GAVIGO Inc. | Wilmington, Delaware, United States | Remote | Oct 2025 – Present

- Own the intelligence layer of an app-activation platform: built the AI scheduler that pre-warms content on Kubernetes (GKE) so a tapped game resumes in under a millisecond, and moved the platform across clouds (DigitalOcean to GCP) with zero downtime. Promoted from Core Engineer to Founding Principal Engineer across three renewals, building nearly the whole system solo.

Senior Full-Stack Engineer & Website Team Lead

She Sharp | Auckland, New Zealand | Hybrid | Jul 2025 – Present

- Rebuilt the member platform for New Zealand's leading women-in-STEM charity (2,200+ registered members, 8,000+ women supported lifetime) — one system for sign-ups, events, and AI-scored mentor matching, carrying 10+ years of content across with zero broken inbound links, ~85% solo over a year.

Chief Technology Officer

FemTech Weekend | Chengdu, Sichuan, China | Remote | Mar 2025 – Present

- Sole engineer behind China's first women's-health-technology organisation; rebuilt its web platform twice as the mission grew, and ran the digital infrastructure for the 2026 Shanghai Summit, a four-day event with 20 speakers headlined by Ida Tin, who coined the term FemTech.

Chief Technology Officer

Sanicle | Tulsa, Oklahoma, United States | Remote | Mar 2025 – Feb 2026

- Joined as Senior AI/ML Infrastructure Engineer and was promoted to CTO; took the company from a no-code prototype to production B2B FemTech SaaS, and personally integrated IBM watsonx — the work that earned Sanicle its IBM Silver Partner certification.

Earlier experience

Technology & Professional Development Mentor, Forward with Her | China | Oct 2024 – Sep 2025

Backend Developer, ByteDance | China | Nov 2024 – Mar 2025

Full Stack Developer & Lead Documenter, CORDE | Canterbury, New Zealand | Jun 2024 – Nov 2024

PROJECTS

ArchCanvas and ArchLang | archcanvas.uk

An AI design agent for architects and self-builders: invented ArchLang, the open-source language that turns a floor plan into a precise program (34 npm releases, full editor tooling), then built the commercial product on top — so edits are exact, diffable, and replayable rather than regenerated.

Tam-AI-Ti | tamaiti.whiri-ai.com

A bilingual (te reo Māori and English) AI financial-wellness app built solo on commission from Riria (Missy) Te Kanawa, Māori Executive Lead at ASB Bank; culture is typed data in the schema (Maramataka phases, Te Whare Tapa Whā domains); a 19-user cohort produced 181 journal entries over 4 months.

Vitex – AI Career Agent | vitex.org.nz

Paste a job description, get a tailored resume and cover letter scored against its keywords in under 30 seconds; sole-authored over ~18 months, with Typst compiling the finished PDF locally in under 100 ms across 7 templates — no hosted Chromium, no third-party document service.

Google News MCP Server | github.com/ChanMeng666/server-google-news

An earliest-ecosystem Model Context Protocol server, shipped 35 days after Anthropic launched MCP and before a registry existed: a PulseMCP Top Pick, a Glama A-rating, and ~125 GitHub stars.

Also built: echook (notifications for Claude Code, Cursor, and Codex), eatropolis.co.nz (Auckland food-festival platform, solo in 9 days), gradient-svg-generator (355 animated-SVG templates), typst-claude-skill (typesets this resume), and Seismophone.

EDUCATION

Master of Applied Computing, Lincoln University, New Zealand | Nov 2023 – Dec 2024 | Distinction, Dean's List (Top 5%)

Bachelor of Geography Science, Jiangsu Normal University, China | Sep 2012 – Jun 2016 | Distinction

CERTIFICATIONS

Anthropic (6, 2025–2026): Building with the Claude API, Introduction to MCP, Introduction to Agent Skills, Claude Code in Action, AI Fluency: Framework and Foundations, Claude Certified Architect: Foundations curriculum (Partner Network track)

Other (50+ total): Google AI Essentials, Microsoft Azure AI Essentials, GitHub Professional, Docker Professional, HackerRank Software Engineer plus 22 skill certifications including SQL (Advanced)

AWARDS AND RECOGNITION

- UN CSW 69 Speaker, UN Headquarters, New York City, March 2025 — attracted IBM pilot interest and an endorsement from Sierra Leone's Minister of Gender and Children's Affairs.
- Outstanding Mentor Award, AI Hackathon Festival 2025 (1 of 14 expert mentors); Excellence Award, FemTech China Women's Health Technology Challenge, December 2024; Outstanding Performer, UN Women FemTech Hackathon, FemTech Weekend Beijing, March 2025.
- Community reach: 5,856 LinkedIn followers, 23 recommendations, 1,103 newsletter subscribers, 480+ GitHub stars, CopilotKit contributor (2 merged PRs).
